

INTRODUCTION AND GENERAL INFORMATION

You can use the Map Update Tool, your computer, and a USB stick to add maps to your vehicle's navigation system (Center CM-C 19) and update or delete maps that are already saved there.

Note

- In order to transfer a full map between your computer and your Navigation System, you need a USB stick containing **at least 32 GB** of free space.
- Your computer must be connected to the internet.

Supported operating systems and USB-sticks

- Operating systems: Windows 10/11 and macOS 10/11/12
- USB stick only (no external HDD / SSD / Hub) - containing a minimum of 32 GB free space
- USB protocol versions: USB 2.0 and USB 3.0
- USB-formatting: FAT32 or exFAT

To update your Navigation System following steps need to be performed:

1. Insert the USB stick into the USB socket "audio" or "phone" of your vehicle's navigation system and wait until the information is copied to your USB stick.
2. Start the Map Update Tool on your computer
3. Insert the USB stick to your computer
4. Download a full map onto your USB stick
5. Insert the USB stick into the USB socket "audio" or "phone" of your vehicle's navigation system and follow the on-screen instructions.

In next chapters above indicated steps will be explained.
